

Serious power for your serious boating.

40^{XR} / 50 / 60

Mercury outboards with the most efficient powerplants in their class.

Bar none. The standards-setting four-cylinder 40 XR is your means of making the very most of your

cruising opportunities. Three-

cylinder Mercury 50 and 60 models provide even better

acceleration, higher top speed, yet with 25% better fuel efficiency

than the competition.

Changes to the 40 XR include state-of-the-art design nitrile engine mounts for added

ruggedness and a new 16-amp alternator for more start-up

power and battery charging, outcranking others with up to four times as much power. What has

not changed is that the Mercury 40 XR is ultra-smooth right up

through the revs, thanks to its short stroke. A factory-installed tiller model is available for those who prefer it.

Mercury 50 and 60 models use loop-charge induction from three carburetors instead of two for their outstanding performance.

Blocks use the same lost-foam casting techniques as Mercury V6s: built to last as well as to perform

And with Mercury you have the option of the world's most

advanced power trim and tilt. A full 20° of trim and 75° of tilt push

you up on plane faster, allow you to cruise more efficiently and go

easy on the fuel. Tiller models give you full 90° steering for

unparalleled manoeuvrability.

The 40 XR, 50 and 60. An outboard to suit any boating pleasure. However seriously you take it.

MORE MERCURY FEATURES TO BENEFIT BOATING

* Highly reliable, single-point oil injection mixes petrol and oil at the optimum ratio for economy and efficiency.

* A cowl-mounted power trim switch means that you can raise your engine from outside the boat, a useful aid when launching or trailering the craft.

* A new high-performance fuel pump is included as standard. Results include higher capacity and higher lift.

* Rose-petal reed block assembly on the 50 and 60 burns the fuel more easily and completely, adding to your boat's economy.

High capacity water pump for cool, smooth running. (50 and 60 hp)
